

NEW TRADESMAN FISHER SPACE PEN

M4 STYLE

FISHER SPACE PEN CO. | www.spacepen.com
711 Yucca Street, Boulder City, NV 89005 USA | T 702-293-3011 F 702-293-6616

The Tradesman is the **NEWEST** addition to the Fisher Space Pen Cap-O-Matic family. After years of adoration by the light industrial and construction industries, Fisher Space Pen brings to you the most durable and reliable writing instrument on any job site! After stories of failed pens, and lengthy walks back to the truck to find another pen, contractors and construction tradesmen are finally getting what they want. The construction yellow finish makes this pen the easiest tool to spot on the job site, in your truck or your toolbox. Ever dropped a pen walking the jobsite and can't find it? That won't be the case with the Tradesman. It stands out from 100 feet away, clear as day. Need your company logo added to this tool? We can do that too!

The Cap-O-Matic line utilizes cap activation to extend and retract the point, and each carries a gas pressurized PR style ink refill cartridge, which means that they feature all the unique capabilities that are synonymous with Fisher products: they will write upside down, at any angle, under water, through grease, in extreme temperatures (-30 to +250 degrees F), on almost any surface, three times longer than the average pen, and, of course, in the gravity free vacuum of space. All Fisher Space Pens are lifetime guaranteed for quality against all manufacturing defects.
